

SECU-CHEK

IF FAILURE IS NOT AN OPTION

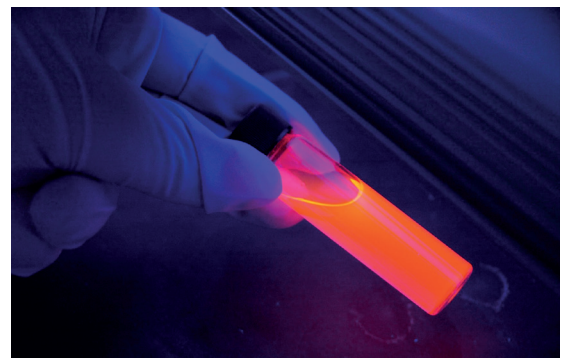

SECU-CHEK UPG2-KS (UV400)

UV PROTECTION AND SAFETY GLASSES

Optimized for fluorescent inspection in darkness

- large field of view, frameless
- non-fluorescent, non-reflective
- for reliable NDT processes and leak detection
- also suitable for spectacle wearers
- engineered by NDT experts

Technical Data

UV protective filter:	UV 400	Mechanical strength:	F
Protection level:	2C-1.2 (EN170:2002)	Polycarbonate:	clear
Optical class:	1	Weight:	40 g
CE - Conformity:	CE EN166F / EN170F	Dimensions:	17 x 7 x 6,5 cm (closed)
ANSI - Conformity:	ANSI Z87	SKU:	UPG2-KS

UPG2-KS High Quality UV Goggles

Our high-quality SECU-CHEK UV goggles offer maximum protection (UV400) with optimal wearing comfort. UV radiation is completely intercepted.

Highest optical quality made of polycarbonate for clear view and minimal impairment, frameless design with large pane for maximum viewing area and large field of vision.

No self-fluorescence due to UV radiation of any parts of the glasses for totally clear view and excellent vision. The goggles have a scratch-resistant coating and are ideal for evaluating fluorescent crack tests (NDT) in dark rooms.

2C-1.2 (EN170:2002)

UV protection with good color recognition. This product meets the requirements of the standard and offers UV protection for the entire specified range (210 nm - 365 nm)

The flexible handles can be individually adjusted and thus offer excellent wearing comfort. The soft nose rest guarantees a pressure-free fit and at the same time prevents the glasses from slipping.

Work relaxed and safe with the UPG2-KS UV Goggles:

- all around 100% UV protection (UV400), also from above and on the sides
- extra large, unrestricted field of view with excellent optical quality
- UV goggles ideal for evaluating fluorescent crack tests (NDT) in dark rooms
- non-fluorescent (also especially without micro-reflections!), non-reflective
- maximum wearing comfort due to length- and tilt-adjustable brackets
- also suitable for spectacle wearers, pressure-free seat on the nose
- including high-quality, black non-fluorescent microfiber cloth (no fluorescent parts!)
- UV goggles classified as personal protective equipment (PPE) according to DIN EN 166 F & EN 170 (CE compliant). ANSI compliant.
